

EXHIBIT # 20

M-20 ARMORED CAR

USA

Developed by Ford Motor Company in 1943 as an armored utility car, the M-20 "Utility" had a Browning M2 50-cal machine gun that rode on an M49A1 ring mount. Used by Tank Destroyer units along with the M8 Greyhound (mounted a 37 mm gun), it was considered a leading design for the role of reconnaissance. It still remains in service in many overseas countries.

The M8 Greyhound is also on display inside the museum.
